

EV-D12105-A

105W 120V to 12V Dimmable Transformer UL approved

This is an Electronic transformer, with many built in safety protections, so it will not output any voltage until a minimum HALOGEN OR INCANDESCENT load is present, min 10W for the 60W. It will not work with LED Load.

- Fully dimmable With standard TRIAC dimmers
- Single Input 120VAC, $\pm 6\%$, 50/60 Hz, 0.9A, PF>0.98
- Output 11.5V $\pm 6\%$, min load 20W, max load 105W
- Dimmable with standard TRIAC dimmers
- Approvals: **UL**, cUL class 1, CE, FCC, RoHS
- Suitable for Halogen Downlights.
- Flying leads for rapid connection
- IP20 For dry location
- Protection: Short-Circuit, Overload, Over Heat
- Soft start to prolong lamp life
- Auto-restart function when fault condition is removed
- -10°C to $+40^{\circ}\text{C}$, full load, max case 65°C . 20 to 95% RH NC
- Size: 4.29" L x 1.81" W x 1.14" H (109mm L x 46mm W x 29mm H)
- Shell material: Plastic
- 2 year warranty
